A conceptual model for better collaboration

Jeremy O'Brien
Senior Traffic Engineer, Highways and Network Operations
NZ Transport Agency - Waka Kotahi
The challenge

• **Which topics** need collaboration?
• **At what point** is collaboration necessary?
• **Who** do we collaborate with?
The challenge

• The conceptual model:
  1. Network activities
  2. Network variables
• How to use it
Network Activities

(Efforts by people to manage the transport network)
• The conceptual model:
  1. Network activities
  2. Network variables
• How to use it
Network Variables

(Things that affect real time network conditions)
Demand
Priority
Capability
Availability
Control

Environmental demand / supply

Real time network conditions
Response
Resilience
Performance
Efficiency
Supply
The challenge

• The conceptual model:
  1. Network activities
  2. Network variables
• How to use it
