Paper Details:

Presentation title:	Incorrect Street Light "Switch On" Times
----------------------------	--

Overview of Presentation

Why do street lights not react correctly to prevailing weather condions.

Can IPENZ as a group get the setting system corrected.

The current Welllinton system was diluted for a long forgotten Energy Crisi. The trigger value has never been re-set.

There is only one trigger for the region and it can be out by more than 30 minuities. Gulp!
